**Re: Responses to: Initial Submission Review – Ohr Avner Synagogue - Site Plan with
an Adjustment Application Number: DA-2313-00
Case Numbers: 2022-6016-00**

Dear Mr. Bachayev:

Thank you for your initial submission, which we started to process on Monday, March 28, 2022. We have reviewed your plans and attached our comments along with this cover letter. The first section of our review highlights our major comments. The following sections contain more specific comments, including those received from other city departments and community members.

Since several important issues remain, you will need to make another submission. Please revise your previous work and send us a new submission on or before May 12, 2022. Please feel free to contact Planning staff to schedule a meeting if needed.

Note that all our comments are numbered. When you resubmit, include a cover letter specifically responding to each item. The Planning Department reserves the right to reject any resubmissions that fail to address these items. If you have made any other changes to your documents other than those requested, be sure to also specifically list them in your letter.

Your Planning Commission hearing has been *tentatively* scheduled for Wednesday, June 22, 2022.

Please remember that all abutter notices must be sent, and the site notices must be posted at least 10 days prior to the decision date. These notifications are your responsibility and the lack of proper notification will cause the public hearing date to be postponed. It is important that you obtain an updated list of adjacent property owners from the county before the notices are sent out. Take all necessary steps to ensure an accurate list is obtained.

As always, if you have any comments or concerns, please let me know. I may be reached at 303-739-7541 or rrabbaa@auroragov.org.

Sincerely,

Rachid Rabbaa, Planner I
City of Aurora Planning Department

Initial Submission Review

SUMMARY OF KEY COMMENTS FROM ALL DEPARTMENTS

- See the comments from Planning. (Items 1, 2 and 3)
- See comments from Landscaping (Item 4)
- Please submit a preliminary digital addressing .SHP or a .DWG file. Addressing (Item 5)
- The Site Plan will not be approved until the master drainage study is approved. Engineering (Item 6)
- See comments for the Parking Study, Traffic Letter and Site Plan. Traffic Engineering (Item 7)
- See comments to add, remove notes, update data block information and other comments from Fire and Life Safety (Item 8)
- Provide access path to top and bottom of outlet structure. Path must be a minimum of 12 FT wide and max 10% grade. Aurora Water (See Item 9)
- When the site plan is submitted, please show and label all existing trees on a separate sheet called Tree Mitigation Plan and indicate which existing trees will be preserved or removed. Please include grading on this sheet as well. Forestry Division staff will conduct a tree assessment after the initial submittal. (Item 10)
- Your property abuts the Westerly Creek Regional Greenway and Trail corridor to the south. Whenever development occurs adjacent to parks or open space a 25' special landscape buffer is required. PROS (Item 11)
- The walls (License Agreement) and the easement dedications need to be completed prior to the acceptance of the Site Plan Amendment. Real Property (Item 12)

PLANNING DEPARTMENT COMMENTS

1. Community Questions, Comments and Concerns

1A. Comments were received from outside registered neighborhood organizations. (Please see the attached pdf's)

- Name: Donna George
Organization: Xcel Energy
Address: Public Service Company of Colorado dba Xcel Energy
Phone: 13035713306
Email: donna.l.george@xcelenergy.com
<http://intraweb2:80/DevelopmentPlanReviewAD/MyProjects/ViewFile.aspx?FileID=UzYCjx5HogM=>
Comment: please see attached; No resubmittals necessary.
- Name: TERRI MAULIK
Organization: 6924 S LIMA ST
Address: ARAPAHOE COUNTY PLANNING DIVISION CENTENNIAL CO 80112
Phone: 720-874-6650
Email: REFERRALS@ARAPAHOEGOV.COM
Comment: THANK YOU FOR THE OPPORTUNITY TO REVIEW AND COMMENT ON THIS PROJECT. THE ARAPAHOE COUNTY PLANNING DIVISION HAS NO COMMENTS; HOWEVER, OTHER ARAPAHOE COUNTY DEPARTMENTS AND/OR DIVISIONS MAY SUBMIT COMMENTS.
- Name: Referrals
Organization: 6924 S LIMA ST

Phone: 720-874-6500
Email: REFERRALS@ARAPAHOEGOV.COM
<http://intraweb2:80/DevelopmentPlanReviewAD/MyProjects/ViewFile.aspx?FileID=9fb/4UTazWA=>
Comment: No comment letter is attached.

- 2A. Per UDO Place of Worship: 1 space per 4 seats in primary place of assembly. In your letter of Introduction new facility will be approximately 22,000 square feet with a seating capacity of around **287 people**. An occupant load of 287 persons requires **72** parking spaces, not 49. Staff will work with you on parking reduction analysis as the site is located near public transit.

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

- 2B. Parking Study: Please use the current UDO Section 146-4.6.4 Parking Alternatives. The parking study is deficient as there is no discussion about synagogue operations and expected capacity throughout the week, which also includes expected capacity at weekly Shabbat services. Furthermore, there is no description of the expected enrollment associated with the daycare.

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

- 2C. If there is an opportunity for a shared parking agreement with the nearby office complex where Ohr Avner is currently located, that would be helpful in providing some additional parking as required by code.

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

Site Plan

- 2D. All abutting zone districts must also be labeled on the Site Plan.

Responses: Now labeled.

- 2E. Label the access movements on the Site Plan.

Responses: Access is now labeled.

- 2F. Please show internal pedestrian paths.

Responses: Accessible routes are now shown in red.

- 2G. Please show Dimension parking spaces.

Responses: Now dimensioned.

- 2H. Trash Enclosures - Please show the location of garbage and recycle area.

Responses: Trash enclosure is now shown.

- 2I. Please provide materials calculations (%) verifying that you are meeting the architectural design.

Responses: Please see the area calculations on the elevation sheets

- 2J. Please add material calculation to the elevation pages.

Responses: Please see the area calculations on the elevation sheets

2K. Please include a maximum of two elevations per sheet.

Responses: Please see the revised elevation sheets

2L. Please provide a material/sample exhibit outlining colors and materials. “Darker” and “lighter” stucco is not sufficient.

Responses: Please see the attached material board

3. Signage Issues

3A. If any monument signs are proposed the footprint must be shown on the Site Plan and Landscape Plan, with details provided on materials, colors, proposed lighting, etc. on Architectural Details page. All monument signs must match the design aspects of the building.

Responses: The monument sign location is shown and labeled on the site plan.

4. Landscaping Issues (Kelly Bish / 303-739-7189 / kbish@auroragov.org / Comments in bright teal)

4A. Any adjustments in landscaping being requested should be listed on the landscape plan and the cover sheet. The Letter of Introduction should be updated to reflect the adjustment request and a hardship should be expressed. Hardships typically include easements, the presence of utilities both above or below ground, floodplain etc. The applicant shall propose mitigating measures to offset the adjustment request.

Responses: Adjustments to be requested upon forestry and landscape review.

4B. All parking rows are to terminate with a tree and 6 shrubs. Grasses are not permitted as the only plant. Only 20% of the required plant material can be ornamental grasses.

Responses: Parking rows terminate with trees and 6 shrubs where possible.

4C. Buffer width required is 25' but may be reduced to 12' with a masonry wall. Provided is approximately 4'. This does not meet UDO requirements and therefore an adjustment should be requested.

Responses: Adjustments to be requested.

4D. Dimension the buffer.

Responses: Dimension provided for buffer.

4E. These landscaped islands should be 9'x18'.

Responses: Provided islands are 9'x18'.

4F. 6 shrubs required per small island.

Responses: 6 shrubs provided per small island.

4G. Building perimeter landscape measurements.

Responses: Building perimeter landscape measurements provided.

4H. Adjust the location of the required street trees with the next submittal to be within the proposed detached sidewalk.

Responses: Existing sidewalk to remain, street trees have been placed where possible between sidewalk and property line.

4I. Dimension and label the street frontage buffer once the correct detached sidewalk and curbside landscape is provided.

Responses: Dimensions and labels have been provided based on retaining the existing sidewalk.

4J. Dimension and label the street frontage buffer once the correct detached sidewalk and curbside landscape is provided. Street frontage buffers are measured from the back of walk not the property line.

Responses: Dimensions and labels have been provided based on retaining the existing sidewalk.

4K. Label as the Ohr Avner Synagogue.
based upon water usage and the site can not contain more than 33% non-water conserving area. Please specify how this area will be landscaped.

Responses: Label has been revised.

4L. Provide a cross section through here. Typically, a double row of shrubs is required to screen parking lots.

Responses: Cross section has been provided to identify rows of shrubs on both sides of retaining wall where possible.

4M. The actual landscape treatment turf vs. mulch needs to be specified. It can't be either and/or. Irrigation tap sizes are

Responses: The landscape treatment for the area has been specified as mulch.

4N. Unless the proposed wall for the detention pond area is being used to screen the parking lot, grasses are not permitted for this purpose.

Responses: Grasses have been replaced with shrubs to screen parking lot.

- 4O. The curbside landscape that is the area between the face of curb and back of walk is required to be 8' wide with a 5.5' detached walk. Provide the correct curbside landscape area and adjust the location of the proposed street trees to be within the 8' area.

Responses: Curbside landscape area with 8' width has been provided. Based on the presence of utility and drainage conflicts, street trees are not being proposed within the landscape area.

- 4P. Dimension and label the special landscape buffer. No encroachments are permitted eve

Responses: The buffer has been dimensioned and labeled.

- 4Q. Shrubs should be contained within edger per code. Shrubs planted in native seed will be a maintenance issue.

Responses: Planting design has been revised to provide for shrubs within edger.

- 4R. In connection with the note above, curbside landscapes less than 10' in width are required to be shrubs. One shrub per 40 sf of curbside landscaping. Refer to the Pre-application review letter.

Responses: One shrub per 40 sf of curbside landscape has been provided.

- 4S. The site plan shows sidewalk in this location not rock mulch. No encroachments are permitted including sidewalks within the 25' wide Special Landscape Buffers.

Responses: Encroachments have been removed within 25' buffer.

- 4T. Is a dumpster proposed? If so, show the dumpster location and make sure it is enclosed and landscaped in accordance with the UDO.

Responses: Dumpster is being proposed and screened with walls and adjacent fencing.

- 4U. Separate out the deciduous trees from the evergreen trees.

Responses: Deciduous trees have been separated from evergreen trees.

- 4V. Increase the font size of the plant schedule too small.

Responses: Font size has been increased.

- 4W. Building perimeter landscaping is not lump sum. It should be broken down by building face. Landscaping is required along the east and western faces of the building in connection with the UDO requirements. List the east and west sides separately.

Responses: Building perimeter landscape for east and west faces have been provided.

- 4X. Curbside and street frontage buffers are two different requirements that must be met individually and independently of one another. One occurs with the curbside landscape (tree lawn) and the other measured from the back of walk. Both sidewalks along S. Kenton Way and S. Kingston Street are supposed to have detached sidewalks. See comments on landscape and site plan sheets. Break out the requirements individually in the table and provide the required landscaping for each.

Responses: Existing sidewalk along S. Kenton Way to remain based on-site limitations. Landscape requirements have been provided where possible. Detached sidewalk has been provided along S. Kingston Street with landscape requirements where possible.

- 4Y. Provide a table documenting the detention pond landscaping requirements.

Responses: Detention Pond items have been included in the table. Based on easement conflict, shrubs have been provided where possible.

- 4Z. Provide a column for buffer widths required/ provided for the street and non-street buffers.

Responses: Column for buffer width has been provided.

- 4AA. Not required but for clarity, it might be best to provide separate tables for the curbside landscape vs. non-street and street frontage buffers and building perimeter landscaping due to the various and differing landscape requirements.

Responses: Revised table includes separated buffers.

- 4BB. Non street buffer plant material is one tree and five shrubs per 40 linear feet. 30% of the trees shall be evergreen. Please refer to the pre-application review letter that details the landscape requirements.

Responses: 50% of the trees have been provided as evergreen.

- 4CC. Change this heading to 25' Special Landscape Buffer.

Responses: Heading has been revised.

- 4DD. Remove this portion of the note.

Responses: Note has been revised.

5. Addressing (Phil Turner / 303-739-7357 / pcturner@auroragov.org)

- 5A. Please submit a preliminary digital addressing .SHP or a .DWG file as soon as possible. This digital file is used for street naming, addressing and preliminary GIS analysis. Include the following layers as a minimum:

- Parcels
- Street lines
- Building footprints (If available)

Please ensure that the digital file is provided in a NAD 83 feet, State plane, Central Colorado projection so it will display correctly within our GIS system. Please provide a CAD .dwg file that is a 2013 CAD version. Please eliminate any line work outside of the target area. More information can be found at: tinyurl.com/3xe6ds46 or by

contacting CADGIS@auroragov.org

Responses: CAD file is included with the resubmittal.

6. Civil Engineering (Julie Bingham/ 303-739-7403/ jbingham@auroragov.org / Comments in green)
Site Plan Sheet 1

6A. The site plan will not be approved by public works until the preliminary drainage letter/report is approved.

Responses: Noted.

- 6B. Add the following note: The streetlight or pedestrian light installation within the public right-of-way shall be designed, funded, and constructed by the developer/owner. Ownership and maintenance of the street/pedestrian lights shall be the responsibility of the City of Aurora once they have been accepted. Street light and/or pedestrian photometrics plans shall be prepared and submitted to the City for review and approval and shall become a part of the approved civil construction plans for the project. An electrical plan showing site location of lights, electrical one line and grounding details shall be submitting to the Permit Center for review by the Building Department. The owner is responsible for obtaining an address for the meter(s) from the Planning Department. A Building Permit for the meter and a Public Inspections Permit for the street lights are required. Certificate of occupancies will not be issued until the street and/or pedestrian lighting plans are approved, constructed, and initially accepted.

Responses: Note has been added to the site plan sheet.

Sheet 2

- 6C. Indicate the material of the proposed walls.

Responses: Material has been added. WDA

- 6D. Dimension the ROW with arrows.

Responses: Now provided.

- 6E. Dimension the existing sidewalk.

Responses: Now provided

- 6F. Label the pavement type - asphalt?

Responses: Asphalt is now labeled.

- 6G. Dimension the parking spaces.

Responses: Typical dimensions have been added.

- 6H. Include a section detail for the wall. Railing is required for walls over 30". Structural calcs are required for walls over 4'.

Responses: A typical section is now provided.

- 6I. Minimum curb radii for accesses onto public street is 15', typical.

Responses: Radii has been revised to 15 feet.

- 6J. Street lights are required on both S Kingston Street and S Kenton Way. Please show the locations of the lights on all sheets and add the following note: Street light locations are conceptual. Final locations will be determined with photometric analysis submitted with the street lighting plans in the civil plan submittal.

Responses: Note has been added to sight plan. Locations TBD by Loren.

6K. Label all existing and proposed easements.

Responses: Easements have been labeled. The only easement on this property are the proposed sidewalk and drainage easements.

6L. The curbside landscaping shall be 8' wide. Please provide a sidewalk easement set back 0.5' behind the back of walk for portions of sidewalk that are outside the public ROW.

Responses: Easement is now shown.

6M. Show connection to existing.

Responses: Connections are now labeled.

Sheet 3

6N. Add slope labels on the grading plan indicating the following:

- Minimum pavement slope: 1% for asphalt, 0.5% for concrete.
- Minimum slope away from the building is 5% for 10' for landscape areas, minimum 2% for impervious areas.

Responses: Labels have been provided.

6O. Add slope labels or add a label indicating the max slope in any direction for the ADA parking spaces is 2%.

Responses: Slope label has been provided.

6P. Label the ROW width.

Responses: Now labeled.

6Q. Indicate the max height or height range for the retaining walls.

Responses: Now provided.

6R. For the pond:

- 2% minimum slope in the bottom of the pond.
- Max 4' tall walls in the detention pond.
- Show the 100-year WSEL.
- Label the maintenance access into the bottom of the pond and dimension the width.
- Provide an access easement that connects the pond to the ROW from within the site.
- Show/label the proposed drainage easement for the pond.
- Indicate the direction of emergency overflow.

Responses: This is a rain garden. It must have a flat bottom. Other items are now provided.

6S. Show/label the 100-year floodplain.

Responses: The floodplain is now shown.

6T. Show the base flood elevation in Westerly Creek. The lowest finished floor shall be a minimum of 1' above the base flood elevation.

Responses: The BFE is now labeled.

6U. Is this a swale? If so, indicate the slope. Minimum 2% in grass swales.

Responses: There is a proposed swale on the east side of the building. The slope is now labeled as 1.5%. It will not be vegetated with grass.

6V. Label all existing and proposed easements.

Responses: Easements are shown and labeled.

6W. Add a note indicating if the storm sewer system is public or private and who will maintain it.

Responses: Note has been added.

Sheet 4

6X. Label the ROW

Responses: ROW is labeled.

6Y. Add a note indicating if the storm sewer system is public or private and who will maintain it.

Responses: Note is now provided.

7. Traffic Engineering (Steven Gomez / 303-739-7336/ segomez@auroragov.org / Comments in amber)

Site Plan:

7A. Redesign to remove mix of angled/90-degree parking to eliminate backing conflicts.

Responses: We are not concerned with the one area in front of the building with this condition. We wish to keep this parking layout.

Traffic Letter:

7B. Provide table summarizing trip generation, include all rates, in, out and total trip generation.

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

Parking Management and Mobility Services (Scott Bauman / 303-739-7302 / sbauman@auroragov.org)

Parking Study:

7C. Sheet 1 - 30 Pkg Stalls? How exactly was this parking number obtained? Is it backed up by specific supply &

demand data analysis?

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

- 7D. Sheet 2 - More specific data driven parking analysis is requested. No reference to a detailed "Op's Plan" appears to be provided in this document.

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

- 7E. Sheet 3 - Sabbath. Request additional information and data driven details. What about the other 6-days of the week? What is the projected vehicle demand for parking on non-sabbath days? Please provide data details/ analysis for non-sabbath days.

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

- 7F. Sheet 5 - Large events is mentioned. Please provide more information and analysis on how events are managed in relation to actual parking supply & demand on site.

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

- 7G. Assumed Demand. Request additional information & data driven details. A detailed supply & demand analysis should be provided that breaks down projected parking use by Daytime use, Evening use, and Weekend use. Also, please explain & identify any/all potential peak parking days and associated times.

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

- 7H. This number seems arbitrary. How exactly was this number determined (min 30) as no analytical data or specific parking supply and demand analysis appears to be provided for this specific site/use. More information is requested.

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

- 7I. Regarding on-site employee parking, how many employee cars will be parking on a daily/regular basis?

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

- 7J. Is a *shared parking agreement* being arranged to ensure proper parking resources are available when needed?

Responses: Please see the attached parking analysis letter and the Traffic letter from Roxann Hayes Consulting, LLC

8. Fire / Life Safety (Mark Apodaca / 303-739-7656 / mapodaca@auroragov.org / Comments in blue)

- 8A. Sheet 1 of 14 / Cover

- See comments to add and remove notes.
- See comment to update data block information.

Responses: See the attached revised Cover sheet.

8B. Sheet 2 of 14 / Site

- See multiple comments for gating systems.
- See updated sign details.
- Please label accessible parking signs.
- See comments to show and label FDC, knox box & riser room.

Responses: These items are now shown and labeled.

8C. Sheet 3 of 14 / Grading

- Show the accessible parking spaces and isle on grading sheet.
- Provide a detail of the accessible parking.
- See comment to remove fire hydrant.
- See comment to provide a water main.

Responses: There is no water main in Kenton Way. To build a new one is a major expense with no benefit to this property. Therefore, we cannot place a new hydrant at the access to Kenton. We need to keep the hydrant at the access to Kingston in order to provide a hydrant within 100 feet of the FDC. All other comments have been addressed.

8D. Sheet 4 of 14 / Utility

- See comments to show new and existing fire hydrant locations.
- See comment to remove fire hydrant.
- See comment to provide a water main.

Responses: See previous response.

8E. Sheet 5 of 14 / Landscaping

- See comment to show new and existing fire hydrants.

Responses: Fire hydrants have been addressed, please see the attached revised plans.

8F. Sheet 8 of 14 / Photometric

- See note to show accessible route to ROW.
- See comment to update the shade area; this areas parking arrangement is different than other sheets.
- Please show the accessible route sidewalk.

Responses: See the attached revised plan

8G. Sheet 14 of 14 / Elevations

- See comments to show and label FDC, knox box & riser room door.

Responses: Sees the attached revised plan and elevations

9. Aurora Water (Daniel Pershing / 303-739-7646 / ddpershi@auroragov.org / Comments in red)

- 9A. Provide access path to top and bottom of outlet structure. Path must be a minimum of 12 FT wide and max 10% grade.

Responses: Sees the attached revised plan.

- 9B. Please dimension separation between Fire service and hydrant. Minimum 5 Ft.

Responses: Now dimensioned.

- 9C. Please dimension separation between water and sanitary. Minimum 10 Ft.

Responses: Now dimensioned.

- 9D. Meter and hydrant cannot be placed in hardscape. Please relocate to a landscaped area.

Responses: Now placed in tree lawn

10. Forestry (Becky Lamphear/ 303-739-7139 / rlamphear@auroragov.org / Comments in purple)

- 10A. When the site plan is submitted, please show and label all existing trees on a separate sheet called Tree Mitigation Plan and indicate which existing trees will be preserved or removed. Please include grading on this sheet as well. Forestry Division staff will conduct a tree assessment after the initial submittal.

Responses: Tree Mitigation Plan indicating removed and preserved trees has been provided. Grading has been included on the sheet.

- 10B. Mitigation for trees removed from the property can be accomplished by trees being planted back onto the site through the landscape plan, payment made into the Tree Planting Fund, or a combination of the two. If trees are planted on the site, the mitigation requirement is an inch-for-inch replacement. This is in addition to the regular landscape requirements. Once Forestry Staff conducts the tree assessment, a spreadsheet will be provided showing the dollar value of the trees that will be removed as well as the number of inches required for replacement back onto the site.

Responses: Acknowledged.

- 10C. Civil and SWMP plans will not be approved by Aurora Forestry until tree mitigation has been approved through the Site Plan Process.

Responses: Acknowledged.

- 10D. Any trees that are preserved on the site during construction activities, this includes those trees on the neighboring property, shall follow the standard details for Tree Protection per the current Parks, Recreation & Open Space Dedication and Development Criteria manual. The Tree Protection notes shall be included on the plan. The link for the manual can be found at: <https://www.auroragov.org/cms/one.aspx?pageId=16394080>

Responses: Acknowledged.

11. PROS (Alex Grimsman / 303-739-7154 / agrimsm@auroragov.org / Comments in mauve)

11A. Special Landscape Buffer

- Your property abuts the Westerly Creek Regional Greenway and Trail corridor to the south. Whenever development occurs adjacent to parks or open space a 25' special landscape buffer is required. This buffer is measured from the property line in and may not be encroached into with any building, parking, detention, or water quality ponds. Please removed the encroachment into the special landscape buffer.

Responses: The encroachment has been removed from the special landscape buffer.

- Per the UDO, the landscape required includes 1 tree and 10 shrubs per 30 linear feet. Mississippi Ave. Please coordinate with Clinton Weisz (Cweisz@auroragov.org) for more information regarding timing and requirements of this project.

Responses: 1 tree and 10 shrubs per linear feet have been provided.

- 11B. Aurora Water will be constructing stormwater improvements to Westerly Creek south of your site. This project will include construction of a new 10-foot detached walk along Kenton St. from Westerly Creek north to E.

Responses: Noted.

- 11C. Please include the planned 10-foot detached sidewalk within your plan set.

Responses: Please see the attached revised plan

Page 6

- 11D. Rename PROS (South) Buffer to Special Landscape Buffer (South).

Responses: Please see the attached revised plan

12. Real Property (Maurice Brooks/ 720-587-2657/ ronelson@auroragov.org / Comments in magenta)

- 12A. The walls (License Agreement) and the easement dedications need to be completed prior to the acceptance of the Site Plan Amendment. Go to this link for the Real Property web page document links:

<https://auroragov.org/cms/One.aspx?portalId=16242704&pageId=16509313>

Responses: Noted.

- 12B. License Agreement needed for the walls in the Drainage Easement Go to this link for the Real Property web page document links: <https://auroragov.org/cms/One.aspx?portalId=16242704&pageId=16509313>

Responses: Noted.

- 12C. Offsite sidewalk easement needed for the ramp in the other Lot

Responses: Now labeled.

12D. Sidewalk easement needed for ramp in the Lot

Responses: Now labeled.

Re: OHR Avner Synagogue, Case # DA-2313-00

Public Service Company of Colorado's (PSCo) Right of Way & Permits Referral Desk has reviewed the site plan for **OHR Avner Synagogue**. Please be aware PSCo owns and operates existing electric distribution facilities along the east property line. The property owner/developer/contractor must complete the application process for any new natural gas or electric service, or modification to existing facilities via xcelenergy.com/InstallAndConnect. It is then the responsibility of the developer to contact the Designer assigned to the project for approval of design details.

Additional easements may need to be acquired by separate document (i.e. transformers), in which case a Right-of-Way Agent will need to be contacted.

As a safety precaution, PSCo would like to remind the developer to call the Utility Notification Center by dialing 811 for utility locates prior to construction.

No resubmittals necessary.
