**Re: 48th Avenue Infrastructure Site Plan No. 1 – 2<sup>nd</sup> referral, Case # DA-2062-40**

Public Service Company of Colorado's (PSCo) Right of Way & Permits Referral Desk requests a comment response for **48th Avenue Infrastructure Site Plan No. 1**.

PSCo requests that 10-foot-wide utility easements are dedicated abutting all property lines located along public rights-of-way for natural gas and electric distribution facilities.

As the project progresses, the property owner/developer/contractor must complete the application process for any new natural gas or electric service, or modification to the existing facilities via [xcelenergy.com/InstallAndConnect](http://xcelenergy.com/InstallAndConnect). It is then the responsibility of the developer to contact the Designer assigned to the project for approval of design details.

For additional easements that may need to be acquired by separate document for new facilities, the Designer must contact a Right-of-Way and Permits Agent.

As a safety precaution, PSCo would like to remind the developer to call the Utility Notification Center by dialing 811 for utility locates prior to construction.
