Re: Painted Prairie Town Center Filing 2 Master Utility Letter

To whom it may concern,

This letter serves as a Master Utility Update for the Painted Prairie site. Painted Prairie Town Center can be identified as planning area PA-6 in the master utility report.

A Master Utility Letter to the overall master utility report for the Painted Prairie site for the individual 'Town Center Filing 2' site. Based on the water and sewer demands provided by the developer, no master utility report changes need to be made for the water or sanitary sewer demands. Sanitary sewer demands based on information provided by the developer are lower than the allowable 200,000 gallons per day from the approved MUS 207016. Demands for water consumption based on information provided by the developer are lower than the allowable maximum day demand plus fire flow demand as laid out in the approved MUS 207016.

Please contact me if you have any questions.

Sincerely,

WESTWOOD PROFESSIONAL SERVICES
